

## [Sep-2020 Exam Pass 100% !Braindump2go 200-201 VCE and 200-201 PDF 200-201 113Q Instant Download[Q40-Q60]

2020/Sep Latest Braindump2go 200-201 Exam Dumps with PDF and VCE Free Updated Today! Following are some new 200-201 Real Exam Questions!  
**QUESTION 40** Which type of data typically consists of connection level, application-specific records generated from network traffic?  
A. location data  
B. statistical data  
C. alert data  
D. transaction data  
Answer: B  
**QUESTION 41** What are three key components of a threat-centric SOC? (Choose three.)  
A. people  
B. compliances  
C. processes  
D. regulations  
E. technologies  
Answer: ACE  
**QUESTION 42** An analyst is investigating an incident in a SOC environment. Which method is used to identify a session from a group of logs?  
A. sequence numbers  
B. IP identifier  
C. 5-tuple  
D. timestamps  
Answer: C  
**QUESTION 43** Refer to the exhibit. Which type of log is displayed?

Date	Flow Start	Duration	Proto	Src IP Addr:Port	Dst IP Addr:Port	Packets	Bytes	Flows
2020-11-30	11:21:52	0:00:00	TCP	10.10.10.10:80	10.10.10.10:80	1	100	1

B. NetFlow  
C. IDSD  
D. sys  
Answer: B  
**QUESTION 44** What should a security analyst consider when comparing inline traffic interrogation with traffic tapping to determine which approach to use in the network?  
A. Tapping interrogation replicates signals to a separate port for analyzing traffic  
B. Tapping interrogations detect and block malicious traffic  
C. Inline interrogation enables viewing a copy of traffic to ensure traffic is in compliance with security policies  
D. Inline interrogation detects malicious traffic but does not block the traffic  
Answer: A  
**QUESTION 45** Which two components reduce the attack surface on an endpoint? (Choose two.)  
A. secure boot  
B. load balancing  
C. increased audit log levels  
D. restricting USB ports  
E. full packet captures at the endpoint  
Answer: AD  
**QUESTION 46** An analyst discovers that a legitimate security alert has been dismissed. Which signature caused this impact on network traffic?  
A. true negative  
B. false negative  
C. false positive  
D. true positive  
Answer: B  
**QUESTION 47** Which event artifact is used to identify HTTP GET requests for a specific file?  
A. destination IP address  
B. TCP ACK  
C. HTTP status code  
D. URI  
Answer: D  
**QUESTION 48** Which security principle requires more than one person is required to perform a critical task?  
A. least privilege  
B. need to know  
C. separation of duties  
D. due diligence  
Answer: C  
**QUESTION 49** What are two differences in how tampered and untampered disk images affect a security incident? (Choose two.)  
A. Untampered images are used in the security investigation process  
B. Tampered images are used in the security investigation process  
C. The image is tampered if the stored hash and the computed hash match  
D. Tampered images are used in the incident recovery process  
E. The image is untampered if the stored hash and the computed hash match  
Answer: BE  
**QUESTION 50** What makes HTTPS traffic difficult to monitor?  
A. SSL interception  
B. packet header size  
C. signature detection time  
D. encryption  
Answer: D  
**QUESTION 51** An analyst is investigating a host in the network that appears to be communicating to a command and control server on the Internet. After collecting this packet capture the analyst cannot determine the technique and payload used for the communication.

Which obfuscation technique is the attacker using?A. Base64 encodingB. transport layer security encryptionC. SHA-256 hashingD. ROT13 encryption

Answer: BQUESTION 52What best describes the Security Operations Center (SOC)?A. The SOC is usually responsible for monitoring and maintaining the overall network infrastructure, its primary function is to ensure uninterrupted network service.B. A SOC is related to the people, processes, and technologies that are involved in providing situational awareness through the detection, containment, and remediation of information security threats.C. The SOC is responsible for the physical security of a building or installation location.D. The SOC and NOC are the same entity, with different names. They are responsible for the health and security of the network infrastructure.

Answer: BQUESTION 53Which term represents a potential danger that could take advantage of a weakness in a system?A. vulnerabilityB. riskC. threatD. exploit

Answer: CQUESTION 54Which artifact is used to uniquely identify a detected file?A. file timestampB. file extensionC. file sizeD. file hash

Answer: DQUESTION 55How does an attacker observe network traffic exchanged between two users?A. port scanningB. man-in-the-middleC. command injectionD. denial of service

Answer: BQUESTION 56Refer to the exhibit. Which event is occurring?  A. A binary named "submit" is running on VM cuckoo1.B. A binary is being submitted to run on VM cuckoo1C. A binary on VM cuckoo1 is being submitted for evaluationD. A URL is being evaluated to see if it has a malicious binary

Answer: CQUESTION 57What is a benefit of agent-based protection when compared to agentless protection?A. It lowers maintenance costsB. It provides a centralized platformC. It collects and detects all traffic locallyD. It manages numerous devices simultaneously

Answer: BQUESTION 58Which principle is being followed when an analyst gathers information relevant to a security incident to determine the appropriate course of action?A. decision makingB. rapid responseC. data miningD. due diligence

Answer: AQUESTION 59An engineer runs a suspicious file in a sandbox analysis tool to see the outcome. The analysis report shows that outbound callouts were made post infection. Which two pieces of information from the analysis report are needed to investigate the callouts? (Choose two.)A. signaturesB. host IP addressesC. file sizeD. dropped filesE. domain names

Answer: BEQUESTION 60An analyst is exploring the functionality of different operating systems. What is a feature of Windows Management Instrumentation that must be considered when deciding on an operating system?A. queries Linux devices that have Microsoft Services for Linux installedB. deploys Windows Operating Systems in an automated fashionC. is an efficient tool for working with Active DirectoryD. has a Common Information Model, which describes installed hardware and software
